Work Experience

Full Stack/ Front End Developer

Aug 2023 – Present

MocDT LTD.

As a Full Stack Developer at MocDT, I specialize in front-end development while also contributing to backend tasks. My primary responsibilities include:

- Front-end specialist using React.js, Next.js creating visually appealing and responsive web interfaces.
- Collaborated with design teams to translate concepts into user-friendly front-end designs.
- Supported backend development with Node.js and Express, ensuring seamless API integrations.
- Led and mentored a team of interns, contributing to project success and team growth.

Full Stack MERN Developer

July 2022 – July 2023

DS Legends PTE. LTD.

Designed, Developed and managed a range of full-stack web3 projects utilizing MERN stack technologies, complete with user-friendly front-end interfaces, robust back-end APIs, and seamless database integration. Some challenging project accomplishments:

- Built advanced video AI by turning images into videos with FFmpeg.
- Developed engaging chatbots using the OpenAI API.
- Integrated Stripe for secure online payments.
- Effortlessly integrated a blockchain API into the front-end, elevating security and transparency.

Personal Projects

Power-Hack - a full stack site of a power distribution company

Live | [Client](#) | [Server](#)

- Developed a secure bill management system using React JS and React Bootstrap for the frontend, and Express and MongoDB (Mongoose) for the backend.
- Implemented JWT authentication for user authentication and authorization.
- Features include CRUD operations for bills, search by name/email/phone, pagination, and MVC pattern for efficient organization.

Comingsite - a full stack site of an agency company

Live | [Client](#)

- Developed a responsive digital agency website from scratch using the MERN stack, ensuring seamless user experiences across devices.
- Utilized Tailwind CSS and Ant Design to create a visually appealing and highly responsive user interface, incorporating React Slick for dynamic sliders, enhancing user engagement.
- Implemented AWS Simple Email Service (SES) for efficient and secure email communication, enabling the website to send messages to the admin effortlessly.
- Integrated secure admin panel with user authentication, enabling efficient CRUD operations for content management.

Education

National Institute of Technology

Diploma in Computer Science & Technology.

Licenses & Certification

Complete Web Development – L1

Certified by: [Programming Hero](#)
